

ZERO LEPROSY COUNTRY MODEL

The Global Partnership for Zero Leprosy (GPZL) is accelerating progress towards a world without leprosy through a unique [country-by-country approach](#).

We partner with national leprosy programmes and collaborate with WHO's Global Leprosy Programme to convene stakeholders and create country-led strategies that address local needs to end leprosy (Hansen's disease). We support country partners through [resource mobilization](#), [technical assistance](#), and [online tools](#).

Country Review

National and international experts review current leprosy activities and collect data on local needs.

Roadmap

Stakeholders identify steps that address the needs to end leprosy in the country by 2030.

Action plan

The programme outlines the activities, responsibilities, and budget needed to realize each step of the roadmap.
