Accelerating Action Towards Zero Leprosy Together

The Global Partnership for Zero Leprosy is a coalition of people committed to ending leprosy, also known as Hansen’s disease. Our mission is to facilitate alignment of the leprosy community and accelerate effective collaborative action towards the goal of zero leprosy.

We are focused on three key areas leading to the goal of zero leprosy:

Accelerating research

Partnering with national leprosy programmes

Increasing advocacy and resource mobilization

Photo credit: Rowan Butler for American Leprosy Missions

The partnership includes working groups that are developing:

- 1** An aligned, prioritized **research agenda** to support advocacy for additional investment.
- 2** **Country reviews, visioning roadmaps, and online tools**, that with technical assistance, can support countries in moving towards zero leprosy.

Join the Partnership

Membership is open to anyone who supports the partnership’s principles and includes scientists, researchers, programme managers, persons affected by leprosy, and people working in NGOs and funding organizations. Members participate in working groups on research, best practices and advocacy leading to zero leprosy. Together, we can transform action to get to zero leprosy. **Join today at zeroleprosy.org.**

Zero Leprosy means:

- **No disease**
- **No disability**
- **No discrimination**
- **No stigma**

Download our Action Framework at zeroleprosy.org to learn our goals and timeline through 2025.

Founding Organizations

International Association for Integration, Dignity and Economic Advancement (IDEA)
